Title Title TBD		
Degree programme Computer, Communication and Information Sciences		
Major Machine Learning, Data Science and Artificial Intelligence		Code of major SCI3044
Supervisor Prof. Alexander Jung		
Advisors D.Sc. (Tech.) Sami Jokela, Prof. Marko Turpeinen		
Date 31.12.2022	Number of pages 14	Language English

Abstract

Your abstract in English. Keep the abstract short. The abstract explains your research topic, the methods you have used, and the results you obtained.

The abstract text of this thesis is written on the readable abstract page as well as into the pdf file's metadata via the \thesisabstract macro (see above). Write here the text that goes onto the readable abstract page. You can have special characters, linebreaks, and paragraphs here. Otherwise, this abstract text must be identical to the metadata abstract text.

If your abstract does not contain special characters and it does not require paragraphs, you may take advantage of the abstracttext macro (see the comment below).

Tekijä Joel Himanen

Työn nimi Otsikko suomeksi

Koulutusohjelma Selvitä

Pääaine Selvitä

Pääaineen koodi SCI3044

Työn valvoja Prof. Alexander Jung

Työn ohjaajat TkT Sami Jokela, Prof. Marko Turpeinen

Päivämäärä 31.12.2022

Sivumäärä 14

Kieli Englanti

Tiivistelmä

Tiivistelmässä on lyhyt selvitys kirjoituksen tärkeimmästä sisällöstä: mitä ja miten on tutkittu, sekä mitä tuloksia on saatu.

Avainsanat avainsana1, avainasana2

Preface

Preface.

Otaniemi, 31.12.2022

Joel Himanen

Contents

Abstract	3
Abstract (in Finnish)	4
Preface	5
Contents	6
Symbols and abbreviations	7
1 Introduction	8
2 Background	9
2.1 Circular economy and digitalization	9
2.2 Circularity in the construction industry	9
2.3 Environmental motivation	9
2.4 Financial motivation	9
2.5 Motiva's material data platform	9
3 Model and methods	10
3.1 Data	10
3.2 Features	10
3.3 Prediction targets	10
3.4 Modeling approach and algorithms	10
4 Results	11
4.1 Methods and results of model testing	11
5 Discussion	12
5.1 Meaning of modeling results	12
5.2 Roadmap for data aggregation and preservation	12
5.3 Future modeling possibilities	12
6 Summary	13

Symbols and abbreviations

Symbols

$\mathbf{B}$ magnetic flux density

Operators

$\nabla \times \mathbf{A}$ curl of vectorin $\mathbf{A}$

Abbreviations

AC alternating current

1 Introduction

Contribution: 5%

Order of work: 6/6

2 Background

Contribution: 25%

Order of work: 1/6

2.1 Circular economy and digitalization

[\[1\]](#)

2.2 Circularity in the construction industry

2.3 Environmental motivation

2.4 Financial motivation

2.5 Motiva's material data platform

3 Model and methods

Contribution: 20%

Order of work: 2/6

3.1 Data

3.2 Features

3.3 Prediction targets

3.4 Modeling approach and algorithms

4 Results

Contribution: 10%

Order of work: 3/6

4.1 Methods and results of model testing

5 Discussion

Contribution: 35%

Order of work: 4/6

5.1 Meaning of modeling results

5.2 Roadmap for data aggregation and preservation

5.3 Future modeling possibilities

6 Summary

Contribution: 5%

Order of work: 5/6
